Our Vision

In the vast sea of Solana projects, where speculation runs rampant and investors chase fleeting trends, Wall Street Baby emerges as a beacon of innovation and stability.

We're not just another meme token. We're a powerhouse of value creation. leveraging an unique model to deliver substantial returns through airdropped dividends from community-driven initiatives.

How it works

Tired of rug pulls and missed opportunities?

FIND FLOORED GEMS

At Wall Street Baby, we meticulously scan the market for promising tokens that have experienced meteoric rises followed by steep declines.

This may be due to developers or weak hands selling.

Leveraging funds from our community wallet, we strategically acquire significant portions of these tokens, unveiling our selections in our exclusive Telegram group.

CAMPAIGNS

Our community springs into action, igniting coordinated campaigns across platforms like Twitter to breathe new life into our chosen tokens.

With a global network of investors closely monitoring these projects, they're poised to reinvest as soon as prices begin to soar.

As the market cap skyrockets, we reward our loyal holders with airdrops for their steadfast support.

How it works

TO FOLLOW UP ON ALL OF THIS

Holders will retain full autonomy over their airdropped tokens. Our mission is simple: empower the community, mitigate risks, & share the rewards. We shoulder the risks of acquisition & promotion, redistributing profits among our dedicated members.

This approach shields you from the pitfalls of rug pulls while ensuring you never miss out on lucrative opportunities. By backing us in promoting selected tokens, you're positioned to earn risk-free returns. To realize our vision, we seek a robust community of at least 800 members on Telegram. We prioritize individuals who share our long-term vision, committed to fostering growth and resilience in our ecosystem.

Join us, HODL your tokens, actively engage in our Telegram chat, & be a cornerstone in building something truly revolutionary.

A Revival Example

Revival

The team gets to work after searching for gem.

Consider this: We allocate a portion of our community wallet to a token with a micro/mini market-cap of \$10k or less. Following our announcement and coordinated marketing efforts, its market cap skyrockets to \$150k in a matter of days.

For instance what was once a 20 SOL investment has burgeoned into 300 SOL. We deposit our initial stake (20 SOL) back into the community wallet, leaving 280 SOL for distribution. Assuming 56% of the total token supply (560 million coins) is locked. Dividends are calculated as follows

For every 1,000,000 coins held, you receive 0.5 SOL. Executing this strategy 2-3 times monthly promises monthly airdrops valued at 1-1.5 SOL for every 1,000,000 coins locked up in our Unique lock-up system.

Roadmap

2024

Establish dominance as the main Wall Street Baby via social platforms, marketing agencies and partnerships.

Attain a Telegram Group membership of 800, solidifying our community.

Cement WSB's reputation as a Solana coin revivalist.

Conduct Telegram Group competitions for WSB token enthusiasts (Revival hunts, Memes, Raids)

Roadmap

2024

Q2

Forge strategic alliances with influential personalities across Reddit, YouTube, Instagram, & 4chan. Work ongoing.

Unveil and launch our unique token lock utility with massive marketing.

Initiate our first revival and disperse airdrop rewards to members.
